

Darshan Aswathappa

(510)-650-8661 | aswathappa.darshan@outlook.com | linkedin.com/in/darshanaswath | github.com/xanf-code

Education

Northeastern University, Boston – MS in Computer Software Engineering | GPA: 3.7/4.0 Expected Dec 2026

Courses: Data Structures & Algorithms, Cloud Computing, Software Engineering, Advanced Web Architecture

Certifications: AWS Solutions Architect - Professional, AWS Certified Developer - Associate

Experience

Software Engineer, Dassault Systemes – Boston, MA June 2025 – Jan 2026

- Reduced SQL latency by implementing a Redis cache and optimizing Hibernate for better end-user retention in high-concurrency applications.
- Enhanced data storage and retrieval mechanisms by leveraging SQL-based databases alongside NoSQL technologies, improving latency and operational efficiency.
- Developed service-oriented applications utilizing Node.js and TypeScript within the NestJS framework, ensuring robust, scalable solutions for enterprise-level workflows.
- Implemented unit testing practices across microservices using JUnit and Mockito, adhering to TDD methodologies to ensure code reliability and quality.
- Executed TDD methods to achieve high test coverage, utilizing JUnit and Mockito for early bug detection in Java applications.

Software Engineer, London Stock Exchange Group – Bangalore, India July 2022 – Aug 2024

- Designed financial systems with robust microservices to process large volumes of transactions, ensuring compliance and performance.
- Engineered Scalable microservices using Spring Boot to boost transaction throughput by 200%, modernizing systems for over 400K users.
- Boosted data retrieval speed by designing low-latency Kafka-Elasticsearch pipelines, enhancing real-time market analysis for analysts.
- Resolved production issues through Root Cause Analysis and monitoring dashboards, reducing recurring incidents and sharing technical knowledge.

Projects

GoonedIn goonedin.com

- Resolved the issue of fragmented job searching by developing an automated aggregation engine using FastAPI and Playwright to pull listings from multiple sources and apply AI-driven match scoring with DeepSeek
- Optimized system efficiency and reduced API overhead by implementing a global PostgreSQL caching strategy and a sequential queuing system for structured job analysis
- Architected a real-time dashboard to provide instantaneous job updates for users by implementing a WebSocket communication layer with Next.js (JavaScript) and Zustand for responsive state management

NEU Personalized AI Academic Advisor GitHub

- Simplified academic planning for students by building a vector similarity search engine and React UI to extract information from 500+ unstructured academic PDFs and HTML documents
- Increased recommendation accuracy by achieving a 95% relevance score through the implementation of a semantic matching algorithm using Python, Node.js, LangChain, and Pinecone

Skills

Language: Java, Python, TypeScript, SQL, JavaScript

Framework: Spring Boot, React, Node.js, FastAPI, Hibernate, JPA, Angular, Next.js, RxJS, LangChain

Infrastructure: AWS, Docker, Kubernetes, Terraform, Jenkins CI/CD

Database: PostgreSQL, NoSQL (MongoDB, Cassandra), Redis (Caching), Elasticsearch, Kafka

Tools: REST APIs, GraphQL, WebSockets, Git, Maven, JUnit, Mockito, API Design
