

Darshan Aswathappa

(510)-650-8661 | aswathappa.darshan@outlook.com | linkedin.com/in/darshanaswath | github.com/xanf-code

Education

Northeastern University, Boston – MS in Computer Software Engineering | GPA: 3.7/4.0 Expected Dec 2026

Courses: Data Structures & Algorithms, Cloud Computing, Software Engineering, Advanced Web Architecture

Certifications: AWS Solutions Architect - Professional, AWS Certified Developer - Associate

Experience

Software Engineer, Dassault Systemes – Boston, MA June 2025 – Jan 2026

- Engineered robust microservices with 99% test coverage by applying TDD with JUnit and Jasmine.
- Automated deployment cycles by building CI/CD automation pipelines with Jenkins and SonarQube.
- Accelerated data delivery 25% for a real-time module by leveraging WebSockets, GraphQL and React.
- Built interactive user interfaces by using React (JavaScript) with HTML and CSS for 3,000 clients.
- Delivered a recommendation POC by using two-tower embeddings on the 3DEXPERIENCE platform (8M+ users).

Software Engineer, London Stock Exchange Group – Bangalore, India July 2022 – Aug 2024

- Architected high-availability microservices for financial systems by processing 1.4B daily records.
- Built service oriented systems by leveraging modern backend frameworks (similar to NestJS) on AWS.
- Increased throughput 200% by engineering scalable microservices with async processing for 400K+ users.
- Boosted data retrieval 90% for 500+ analysts by applying Kanban to Kafka-Elasticsearch pipeline delivery.
- Resolved 20+ production issues by applying SRE practices, post-mortems and Scrum, cutting recurrence 75%.

Projects

GoonedIn goonedin.com

- Resolved the issue of fragmented job searching by developing an automated aggregation engine using FastAPI and Playwright to pull listings from multiple sources and apply AI-driven match scoring with DeepSeek
- Optimized system efficiency and reduced API overhead by implementing a global PostgreSQL caching strategy and a sequential queuing system for structured job analysis
- Architected a real-time dashboard to provide instantaneous job updates for users by implementing a WebSocket communication layer with Next.js (JavaScript) and Zustand for responsive state management

NEU Personalized AI Academic Advisor GitHub

- Simplified academic planning for students by building a vector similarity search engine and React UI to extract information from 500+ unstructured academic PDFs and HTML documents
- Increased recommendation accuracy by achieving a 95% relevance score through the implementation of a semantic matching algorithm using Python, Node.js, LangChain, and Pinecone

Skills

Language: Java, Python, TypeScript, SQL, JavaScript

Framework: Spring Boot, React, Node.js, FastAPI, Hibernate, JPA, Angular, Next.js, RxJS, LangChain

Infrastructure: AWS, Docker, Kubernetes, Terraform, Jenkins CI/CD

Database: PostgreSQL, NoSQL (MongoDB, Cassandra), Redis (Caching), Elasticsearch, Kafka

Tools: REST APIs, GraphQL, WebSockets, Git, Maven, JUnit, Mockito, API Design
